("Special Intelligence"), a magazine designed by Douglas Niles. The TSR product code for the revised set boxed is TSR-7620. [6] S.I. He introduced a more structured game environment in which the players worked as agents of secret intelligence agents Orion against his evil opponent, web. The books of subsequent origin in the product line introduce adventure settings both supernatural (agent 13) and futuristic (F.R.E.E.LANCERS). These settings have several recurring characters such as Sebastian Cord and Agent 13. The Top Secret brand ceased production in 1992. TSR was purchased by Da of the coast in 1997, which in turn was purchased by Hasbro in 1999. Top Secret/S.I. Use a quick and simple combat system based on percentages. With little like a single death roller, a player can know not only if a character was hit, but which part of the body has been hit and the size of the damage. Based on statistics, qualities, bonuses and sanctions of a character, the gamemaster (Administrator) gives that character a certain percentage probability of hitting a given goal. The player then rolls for one hundred dice; a result that is the same or less than the percentage of To-Hit succeeds. The successful position is determined by the "Ones" figure of the same roll, and the damage of manual manual by hand is determined by the "Tens" figure. The damage to the weapon ignore the "tensions" of the first roll and require a second roll according to the characteristics of the weapon. For example: the gamemaster could say that you have a likeness of 74% of hitting a target. To be successful, roll two dice on 10 sides (therefore red representing 10s and the black that represents 1S) and obtain a result that is the same or less than that percentage (the most low the best). If you launched a 23, your shot would have hit the enemy agent on the right side of the chest. A second roll would determine the entity of the damage done to that part of the body. Character sheets in top secrets'1. They resemble agent dossier, and are intended to provide rapid and easy reference to all the player's statistics and qualities. They also provide a detailed map of the ten possible stroke points of the body of a character, and an empty vertical area for the design or connection of a representation of the character. Agent 13: The Midnight Avenger of Flint Dille, David Marconi, and Dan Spiggle ISBN 0-88038-581-2 Agent 13: Acolytes of Darkness (PerlopiU based on the novel) The agent 13 TSR has published eight numbers of 13. Assassin Comics which characterized stories set in the countryside of agent 13 which brings history to a more modern era (1990). The first six numbers had a back-up story set in the top secret/S.I. setting. (Orion Vs. Web) who seemed to take place at the end of the agency's secret war. Each problem also contained a miniature game and some problems included character statistics for the role -playing game. Warhawks Warhawks was a series of four numbers comics/modules that brought the top secret/S.I. game, to a travel setting in the time when the characters derive from tattoos. The four numbers characterized character statistics and served as a countryside book, in addition to the adventures of book comics. Top Secret: New World Order in June 2017, Merle Rasmussen announced the release of a reboot entitled Top Secret: New World Order, a new iteration of the series. He had performed the game at conferences and events for two years before the release, regulating the rules and user experience in real time. The game has a system of updated rules for appeal to more modern role -players players. [7] The Kickstarter page for Top Secret: New World Order went live on June 27, 2017. [8] The game started sending Backers in March 2018. [9] The Jerry Epperson reception reviewed Top Secret in Space Gamer n. 29. [10] Epperson commented that "I liked the game, despite its defects.
